SUMMARY

Full-stack developer building production web applications, business systems and automation for small and mid-sized organisations. Recent work includes a multi-tenant school administration platform, an NGO fundraising and events platform, and an AI monitoring system that watches registered sites, detects incidents and performs controlled remediation. Python, FastAPI, React, Laravel, PostgreSQL and Docker. Freelance since 2023, based on the Kenyan coast.

CORE TECHNICAL SKILLS

Languages	Python, JavaScript, PHP, TypeScript
Frameworks	FastAPI, React, Laravel, Node.js
Data	PostgreSQL, MySQL, Redis
Platform	Docker, Nginx, cPanel, n8n, Vercel
Practice	REST APIs, multi-tenant systems, monitoring and remediation, payments integration, reverse proxy and SSL

EXPERIENCE

Freelance Software Developer 2023 – Present
Self-employed

Web applications, business systems and automation for clients across retail, education and the non-profit sector. Python, FastAPI, Laravel, React and TypeScript, deployed with PostgreSQL, Docker and Nginx. Includes the Reaching Out Initiative digital platform.

Technical Support 2024 – 2025
Reaching Out Initiative (ROI)

Technical support for a year, covering systems, hosting and end-user issues. Continues with the organisation on a freelance basis as a client.

SELECTED PROJECTS

Project Monitor for cPanel
Python, FastAPI, React, PostgreSQL, Redis, Nginx, n8n
Monitoring supervisor that watches registered sites, detects incidents, runs AI diagnosis and performs controlled remediation. n8n workflows drive a FastAPI agent; React dashboard with Redis caching; Nginx reverse proxy with SSL.

School Management Platform
Python, FastAPI, React, TypeScript
Full-stack multi-tenant school administration platform. FastAPI backend with a React frontend, tenant-scoped data, forms and reporting.

Reaching Out Initiative Digital Platform
PHP, Laravel, Tailwind CSS, JavaScript
Fundraising, events, volunteering and ticketing platform. Laravel REST API with JWT authentication, dependency-light front end with hash routing, Paystack and Safaricom M-Pesa payments, single-origin deployment.

POS and Online Catalogue
PHP, MySQL, JavaScript
Connected point-of-sale and online catalogue sharing one inventory in real time. Offline queue-and-sync when the connection drops, serial/IMEI and condition tracking, WhatsApp ordering, deployed to cPanel with no build step.

Umma Directory
PHP, JavaScript
Public directory for Muslim businesses, fundis and charities, with business claiming and an admin surface.

EDUCATION

Bachelor of Science in Computer Science • Pwani University • in progress
